Revitalization and Strengthening of the hair

Stimulation of hair growth

Everybody loses in average several dozens of hair per day. Hair loss is normal: it is the result of hair renewal whereby old hairs fall and leave space for new ones. However when losses intensify and become faster than hair renewal, hair density decreases and might lead to visible hair-free patches on the head.

What are the causes? Overstraining, stress, unbalanced or inadequate diets contribute to use up nutrient resources needed to sustain hair growth and renewal.

Shiny from Doppelherz® aktiv was created to help solve hair problems. Its special formula ensures that hair roots are being optimally supplied with vitamins, trace elements and amino acids that are necessary to sustain:

- Hair growth by supporting the production and growth of capillary cells (Vitamin B₁₂, Folic acid, Pantothenic acid, Zinc) and their supply with energy (Vitamins B₁, B₂, B₆ and Pantothenic acid).
- Hair strength by participating in the synthesis of keratin (L-Methionine, L-Cysteine, Biotin, Zinc, Molybdenum).
- Hair color and shine by helping synthesis of capillary pigments and slowing down hair graying (Copper).

One capsule contains:

160 mg L-Methionine, 50 mg L-Cysteine, 50 mg Horsetail powder, 300 µg Biotin, 300 µg Copper, 5 mg Zinc, 15 µg Molybdenum, 1.1 mg Vitamin B₁, 1.4 mg Vitamin B₂, 1.4 mg Vitamin B₆, 2.5 µg Vitamin B₁₂, 9 mg Pantothenic acid, 200 µg Folic acid.

Recommendations:

Take 1 capsule daily at meal with enough liquid. Do not chew.

Do not exceed the stated recommended daily dosage! Food supplements should not be used as a substitute for a varied diet. The product should be stored out of the reach of children.

Energetic value:

1 capsule corresponds to 1 kcal/4 kJ.

Do not store above 25 °C.
