Anti Chute

lactose- &
gluten-free

Stimulates growth of strong and shiny hair

Everybody loses in average several dozens of hair per day. Hair loss is normal: it is the result of hair renewal whereby old hair fall and leave space for new ones. However when losses intensify and become faster than hair renewal, hair density decreases and might lead to visible hair-free patches on the head.

What are the causes? Overstraining, stress, unbalanced or inadequate diets contribute to deplete nutrient resources needed to sustain hair growth and renewal.

Anti Chute from Doppelherz® system was created to help solve hair problems. Its special formula ensures that hair roots are being optimally supplied with vitamins, trace elements and amino acids that are necessary to sustain:

- Hair growth by supporting the production and growth of capillary cells (**Folic acid, Pantothenic acid and Zinc**) and their supply with energy (**Vitamins B₁, B₂, B₆ and Pantothenic acid**).
- Hair strength by participating in the synthesis of keratin (**L-Methionine, L-Cysteine, Taurine, Biotin, Zinc and Molybdenum**).
- Hair color and shine by helping synthesis of capillary pigments (**Copper**).

Moreover, **Doppelherz® system Anti Chute** contains **Horsetail powder** and **Siliceous earth** which are both rich in silicon, a trace element that helps strengthen connective tissues, nails and hair. **Lignans** brought by the **Linseed extract** contribute to reduce hormonal-triggered hair losses and to reactivate hair growth from resting follicles.

One tablet contains:

50 mg Linseed extract (thereof 10 mg Lignans), 100 mg Horsetail powder, 50 mg Siliceous earth, 150 mg L-Methionine, 50 mg L-Cysteine, 100 mg Taurine, 1.1 mg Vitamin B₁, 1.4 mg Vitamin B₂, 1.4 mg Vitamin B₆, 350 µg Biotin, 100 µg Folic acid, 6 mg Pantothenic acid, 100 mg Magnesium, 500 µg Copper, 5 mg Zinc, 27.5 µg Selenium, 15 µg Molybdenum.

Recommendation:

Take 1 tablet daily at meal with enough liquid. Do not chew.

Do not exceed the stated recommended daily dosage!
Food supplements should not be used as a substitute for a varied diet.
The product should be stored out of the reach of children.

Not suitable for children and adolescents. Pregnant and lactating women should consult their doctor before using products with lignans derived from linseeds.

Energetic value:

1 tablet corresponds to 2 kcal/10 kJ.

Do not store above 25 °C.
