gluten-free*

With **CALCIUM, Magnesium, Vitamin D₃, Vitamin C, Zinc and Manganese**
FOR ORAL USE ONLY

- With 300 mg Calcium per 10 ml
- Delicious Orange taste
- Measuring cup included

Doppelherz® aktiv Calciovin Liquid is an easy to swallow, great tasting liquid Calcium formula which has been designed for children, adults and the elderly. **Calciovin Liquid** is intended for people requiring higher intakes of minerals and vitamins essential in order to support bone formation and maintenance.

Calcium, Magnesium, Manganese, Zinc, Vitamin D₃ and Vitamin C play an important role in teeth and bone health.

Adequate **Calcium** intake is required to support bone growth during childhood and bone maintenance during adulthood. Adults might be at risk for osteoporosis due to dietary **Calcium** deficit. Intake of **Vitamin D₃** promotes **Calcium** absorption and its incorporation into the bones.

Magnesium participates in the constitution of the bone matrix and therefore plays a structural role essential for teeth and bones strength.

One of the roles of **Vitamin C** is to enable collagen synthesis which is required to build the frame of the bone matrix. Formation of this collagen frame is stimulated by **Zinc**.

Doppelherz® aktiv Calciovin Liquid is ideal to cover the needs for teeth and bones health of the whole family. Thanks to its liquid form the product is easy to dose.

Composition	Per 5 ml	Dosage:	
		Age	Daily dosage
Calcium	150 mg	3-6 years	2 times 5 ml
Magnesium	50 mg	6-12 years	3 times 5 ml
